PERFORMANCE BY STAR RATING

MAR 2021 – ROOM REVENUE ATTRIBUTION

- In Mar, hotels in Abu Dhabi Emirate reported a double-digit growth (+16%) in room revenues compared to same period in 2020. Year-over-year percentage increases are substantial as prior year comparison has now shifted to pandemic-affected months in 2020. Increase in room revenues is primarily driven by positive performance across 5 & 4-star hotels. These hotel types account for 71% of total room supply
- 3-1 star & hotel apts recorded a drop in room revenues compared to 2020. The decline was largely driven by drop in room rates and to a certain extent, due to the reduced length of stay in hotel apartments. However, it was partially offset by increase in guest numbers

PERFORMANCE BY STAR RATING

YTD MAR 2021 – ROOM REVENUE ATTRIBUTION

- Double-digit declines during the first two months of 2021 has impacted the total room revenues on YTD basis. YTD decline was primarily driven by drop in guest numbers as well as average room rates. However, it was partially offset by higher length of stay compared to 2020
- 5-star hotels continue to report the largest drop in room revenues (-27%), closely followed by hotel apartments (-25%). Decline across all hotel types continue to be largely driven by drop in guest numbers and average room rates

MONTHLY TRENDS

PERFORMANCE BY ZONES

MAR 2021 – ROOM REVENUE ATTRIBUTION

- In Mar, all Abu Dhabi zones reported an increase in room revenues compared to 2020, with Saadiyat Island recording the largest increase (+47%). Year-over-year percentage increases are substantial because of the comparison with pandemic-affected month (Mar 2020)
- Across most zones, increase in room revenue is primarily because of high guest count and room rates. Having said that, ALOS continues to remain below the 2020 levels. High ALOS in Mar 2021 is likely because of companies (private and public) accommodating their employees in hotels and the presence of long-term guests (as a result of quarantine and/or travel restrictions for stranded tourists). In contrast to other zones, increase in Abu Dhabi Island (+5% - the lowest across Abu Dhabi zones) was driven by higher length of stay compared to 2020

YAS ISLAND – MAR 2021

SAADIYAT ISLAND – MAR 2021

ADNEC – MAR 2021

ABU DHABI ISLAND – MAR 2021

PERFORMANCE BY ZONES

YTD MAR 2021 – ROOM REVENUE ATTRIBUTION

- On YTD basis, hotels in Abu Dhabi city reported significant declines (-28%) in room revenues compared to 2020, with declines largely driven by drop in guest numbers and the average room rates. High ALOS continues to offset the decline to a certain extent.
- While most zones reported significant declines in their guest numbers impacting their room revenue vs 2020, decline in room revenues in Saadiyat Island was highly attributed to reduced length of stay. However, hotels in Saadiyat have partially offset this with higher prices, with ARR increasing by 28% vs 2020. In 2020, High ALOS in Saadiyat Island was driven by presence of international visitors

Available rooms for sale

Number of rooms available during the month covered by the report excluding out-of-order (a room status term indicating that a room is scheduled for maintenance, refurbishment, deep cleaning, etc.)

Occupied rooms

Number of rooms used on a daily basis including complimentary rooms.

Occupancy Rate, %

Occupancy is the percentage of available rooms that are occupied, calculated by dividing the number of occupied rooms by the available rooms.

Hotel Guests

Number of guests staying in the hotel including those who occupied complimentary or non-revenue generating rooms either for day-stay or overnight-stay.

Guests Nights

Number of night guests spent in the hotel regardless of the type of rooms they occupy.

Average Length of Stay (ALOS)

Average number of nights guests spent in a single stay, calculated by dividing guest nights by hotel guests.

Total revenues

Revenue generated by hotels from all their operations, including service charge and taxes.

Average room (daily) rate
ARR/ADR

A ratio that indicates average room rate and to what extent rooms are being up-sold or discounted; calculated by dividing room revenue by the number of occupied rooms. (excludes complimentary & house use)

Revenue per available room
RevPAR

Revenue per Available rooms, calculated by dividing the total revenues by total rooms in hotel minus out-of-service rooms
